Roses, Etc.*

— 1907-1908 —

NILES, CALIFORNIA

SIX HUNDRED ACRES

TO CORRESPONDENTS

1st. This Catalogue cancels all previous prices, either in special lists, offers or catalogues. This rule will be strictly observed.

2d. All orders should be sent in as early as possible.

3d. Orders should be legibly written on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble and tending to prevent mistakes.

4th. The articles in the following list will be furnished at the annexed prices **only** when the quantity specified shall be taken. **Fifty**, however, will be furnished at the **hundred** rate, and **five** at the **ten** rate. In no case does this mean so many trees of assorted classes, but refers only to **one class** of assorted varieties, for instance, 5 Apples, or 5 Pears, or 5 Plums, of different varieties, but not 2 Apples, 2 Pears and 1 Plum.

5th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left **entirely** to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

6th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages to the railroad or express offices at Niles.

7th. It is requested that explicit directions for marking and shipping packages accompany each order. When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

8th. We warrant all trees and plants to be good, thrifty and true to label, but having no control over the planting or care after delivery to the buyer, we will not be responsible in any other direction than as stated, and accordingly if any tree or plant should prove untrue to kind, we will either replace the same or refund the amount paid; but in no case will we be liable for any sum greater than that originally paid, and this statement is due notice to buyers of the extent of our responsibility for trees and plants after delivery of the same shall have been accepted by the buyer.

9th. Our customers are requested to notify us immediately of any errors that may be committed in filling their orders, so that we may at once rectify the same, as we desire to conduct our business in all respects satisfactorily to those who favor us with their confidence.

10th. Orders from unknown correspondents **must** be accompanied by the cash or satisfactory reference. Orders to be sent C. O. D. **must** be accompanied by at least one-half the amount in cash; otherwise they will receive no attention.

11th. Remittances may be made by draft on San Francisco, or Wells Fargo & Company and postoffice money orders on Niles, or cash by express, prepaid.

All communications to be addressed to

California Nursery Co.

NILES, CALIFORNIA

....REMARKS....

We present herewith our price-list for the coming season (twenty-third edition), and wish to call attention to a few pertinent facts. Our nurseries are the largest on the Pacific Coast. Our shipping facilities are unexcelled both for domestic and foreign business. For many years we have led in the introduction and testing, under California conditions, the most promising foreign varieties of fruit. We have in actual bearing here at Niles our own trees of every variety we offer for sale. Our buds and cions are taken from these bearing trees, cut and distributed by one man, making the mixture of varieties well nigh an impossibility. The unequaled reputation which our trees have, not only on the Pacific Coast, but in almost every country in the world, is an indication of the great care we exercise in every detail of our chosen line of work.

All interested parties, whether intending to purchase or not, are invited to visit the nursery, and if we are notified of time of arrival at Niles we will have conveyance at station to meet them.

CALIFORNIA NURSERY COMPANY.

Niles, November 1, 1907.

OFFICERS:

Wm. J. Landers, President,

John H. Henn, Secretary,

W. V. Eberly, Manager.

H. W. Meek, Vice-President,

Central Bank, Oakland, Treasurer.

DIRECTORS:

Wm. J. Landers, San Francisco

W. G. Palmanter, Oakland,

Horry W. Meek, San Lorenzo,

A. C. Hammond, San Francisco,

Egbert B. Stone, Elmhurst,

John H. Henn, San Francisco,

F. W. Hosmer, San Francisco.

SPECIAL NOTICE

Those only who can show a certificate of recent date, signed by the President and Manager and with the seal of the company attached, are authorized to solicit orders for us. We wish to call special attention to this notice, as we know it has heretofore been the practice of unprincipled persons to procure the catalogue of prominent nurseries and take orders in their names which they fill with poor stock bought elsewhere. If our patrons will notify us of any person who they have reason to believe is not a regularly appointed agent, we shall consider it a favor.

HINTS ON TRANSPLANTING

The many excellent treatises on Fruit Culture which have appeared within the past few years—one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line; yet we are so frequently asked for advice in this way, that we offer a few general remarks.

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery; but in heavy clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot, dry summers, it is well to shade the sunny side of the tree, to keep borers out, with a board or shake, stuck in the ground, or a piece of burlap wound loose around the tree up to the limbs, top tied loose with a string. Whitewash made out of whiting or lime will also protect the tree against sunscald.

See back of Catalog for list of useful horticultural books we have on hand for sale.

DISTANCE FOR PLANTING

Standard Apples	25 to 30 feet apart each way
Standard Pears	20 to 24 " " "
Strong-growing Cherries	20 to 24 " " "
Duke and Morello Cherries	18 to 20 " " "
Standard Plums and Prunes	20 to 24 " " "
Peaches and Nectarines	20 to 24 " " "
Apricots	24 to 30 " " "
Grapes	7 to 10 " " "
Currants and Gooseberries	4 by 6 feet
Raspberries and Blackberries	3 to 4 by 5 to 7 "
Strawberries for field culture	1 to 1½ by 4 to 5 "
Strawberries for garden culture	1 to 2 feet apart

Number of Trees or Plants on an Acre at Given Distance Apart.

Distance, 1 foot apart each way, number plants.....	Square Method	Equilateral Triangle Method
" 2 feet " " " " "	43,560	50,300
" 3 " " " " "	10,890	12,375
" 4 " " " " "	4,840	5,889
" 5 " " " " "	2,722	3,130

" 22 " " " " "	109	125
" 24 " " " " "	90	104
" 25 " " " " "	75	86
" 30 " " " " "	69	79
" 35 " " " " "	48	55
" 40 " " " " "	35	40
	27	31

Rule—Square Method.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method.—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

INDEX AT END OF CATALOG

FRUIT DEPARTMENT

All our Fruit Trees are grown on whole Seedling roots. The advantages of these in promoting the health and thriftiness of trees over others grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer. All two-year-old trees are branched low and are stocky, having been cut down or headed back when yearlings, two feet above ground, except where noted.

All of our Apple Trees and Grapevines are fumigated with hydrocyanic gas when dug, so are the buds, cions, and cuttings, prior to budding, grafting or planting out in Nursery. This positively kills any insects that may be thereon, without any injury to trees or vines. We have a Fumigating House, with three compartments, so that we can disinfect, at any time, either 50 trees or 10,000.

Apple—New.

WALNUTS

The planting of the improved varieties of the "English" Walnut is steadily increasing, not only in Southern California, but along the whole Pacific Coast, even into British Columbia. These trees are as profitable as any other fruit, and are long-lived if planted in suitable soil, which should be deep, well drained, and capable of retaining the moisture during the summer.

ORNAMENTAL DEPARTMENT

DECIDUOUS ORNAMENTAL TREES**TRAINED TREES**

This class includes a variety of large-sized trees, whose straight, regular stems were headed back or cut down to a uniform height of nine feet, and handsome, well-formed heads grown thereon. They are in splendid shape for planting on avenues, streets or roadsides for immediate effect. With ordinary care, little or no loss should occur in moving them, as they have been frequently transplanted.

Diameter given is four feet above ground.

	Inches in Diameter	Each	Per 10	Per 100

EVERGREEN TREES AND SHRUBS

Nearly all the plants mentioned under this heading have been once or more transplanted, thereby greatly adding to the certainty of their growing. In order, also, to reduce the amount of soil and consequent freight charges, we have grown those varieties most in demand in pots. In shipping to distant points this is especially advantageous.

All balled trees and plants should be set without removing the burlap.

NOTICE

Where we catalogue and specify size of boxes, it means that the trees or plants so listed have been established in boxes for at least six months. BOXED means that the plants so quoted are of such size that it is necessary to dig them into boxes.

					Each	Per 10	Per 100
Acacia —Armata.....	3 in. pot,	3	to	4	ft.	35	3 00

BAMBOO

Bamboo cannot be too highly recommended in garden decoration. This class of plants forms one of the striking characteristics of the vegetation of China and Japan, where many species occur that are hardy here in California. They thrive best in a deep, rich soil, and require plenty

of water when in a growing state. Under the general name of Bamboo are included species belonging to several genera, as *Arundinaria*, *Bambusa*, *Phyllostachys*, etc.

Stock offered is very fine. Plants are bushy.

					Each	Per 10	Per 100

Palmata (<i>Bambusa</i>)							

Palms, Dracaenas, Agaves, Yuccas, Etc.

PALMS

Palms have now become almost indispensable in all decorations, whether for apartments, conservatories, or the production of tropical effects in landscapes. No class of plants makes such a grand display, and none are of more easy culture. Rich soil, mulching and watering will, in a short time, produce grand specimens.

While our main stock of these highly desirable garden ornaments is grown in the open ground, thereby obtaining the finest plants, we also cultivate more or less of each variety in pots and boxes. These are well-established, well-furnished specimens, suitable for hall or house decorations, or, where immediate effect is desired out-of-doors, they can be used to great advantage, being almost absolutely safe from any set-back.

ROSES

Recognizing the growing demand for the "Queen of Flowers," we have increased our assortment of varieties as well as the quantity grown. By constantly adding new sorts that prove worthy of trial and discarding any that are not satisfactory, we keep our collection up to date and offer an assortment unequaled on this Coast.

The plants offered are strong and vigorous, have been grown entirely in the open ground and consequently will not require the careful nursing necessary to those propagated under glass in three months' time and sold at low rates. They can not fail to give entire satisfaction the first summer after planting. From November to March they can be shipped in a dormant state, packed in moss. For culture best adapted to each class, we refer to our Descriptive Catalogue No. 2.

NEW VARIETIES

40 cents each; \$3.00 per 10.

Aurora—Bright glowing pink.

Baby Rambler—Crimson.

Bardou Job—Velvety crimson.

Bessie Brown—Creamy white.
